PROGRAMMER + WIFI SOLAR PUMP

The RainPoint Controller and Pump System is a smart solar irrigation controller that integrates an internal solar water pump. It is designed as a micro-drip system, does not require a water intake and operates without the need for external electrical power thanks to its solar panel. Allows management of the irrigation plan through remote control via App.

MATERIAL CHARACTERISTICS

Housing: ABS

Charging Panel: Solar panel integrated on top

Bank: 18650 rechargeable lithium bank (3.7 V, 2600 mAh)

Accesorios: Viene con tubería, filtro, tapones, micro-goteros,

OPERATING CHARACTERISTICS

Connectivity: Works with Wi-Fi 2.4

Maximum Flow Rate: 30 L/h

Temperature Range: 3°C to 50°C

Irrigation System: Water up to 10 plants

App functions: Management of irrigation plans (up to six plans), manual irrigation, water shortage alert
