ABRAZADERA RANURADA PLASTICA

The slotted clamp is a type of two-piece coupling used to make quick and secure connections in pipe. Its function is to join two ends of grooved pipe or equipment such as a filter, using a gasket to ensure a watertight seal. Easy and quick assembly.

MATERIAL CHARACTERISTICS

Body: PP (polypropylene)

Gasket: in EPDM

Screws: stainless steel

OPERATING CHARACTERISTICS

Maximum Pressure: 20Bar

Easy installation

Diameters: Available in 2" and 3"
