Agitator Support

The removable tank crossbar offers stable and modular support. It is made up of a center and four metal stringers that attach to the center forming a cross. The center is specifically designed to fit an IflowControl agitator.

MATERIAL CHARACTERISTICS

Center and stringers: Electrogalvanized steel.

Screws, washers and brake nuts: Galvanized steel.

OPERATING CHARACTERISTICS

Available in two lengths: 1,1 m and 2 m.

Stringers thickness: 1 cm.

They are attached to the center using three screws and brake nuts.

Modular design that allows quick and easy assembly.
